Key appointment – Concentrate offtake and marketing

Galena Mining Limited (ASX: G1A) (“Galena” or the “Company”) is pleased to announce the appointment of Bill Cunningham as their Metals Marketing Consultant with immediate effect. This appointment is part of the expansion of key technical and management positions which is underway at Galena as the Abra lead-silver project advances.

Bill Cunningham is a highly experienced professional who has had an extensive career involved in marketing and sales of non-ferrous products within CRA (Rio) Lead/Zinc Division, WMC Nickel Division, Jubilee Mines, Western Areas and Lion Ore until the past several years.

Significantly he has recently been working with Sandfire Resources on the concentrate sales and marketing for the DeGrussa mine (2011-2012) and then for Sirius Metals (now part of Independence Group), (2013-2014) on the Nova/Bollinger mine. Both DeGrussa and Nova/Bollinger are underground base metals mines located in Western Australia.

Commenting on the appointment CEO, Ed Turner stated:

“This is a key part of Galena’s drive to bring Abra in to production as soon as possible. The test work to date has shown that Abra can produce an outstanding, high-grade, very clean lead-silver concentrate that will be in high demand from global users. Bill Cunningham, through his recent experience in major WA underground base metal operations offtake, will be highly valuable to us.”

The Company believes Abra has the potential to be a significant project in the global lead market.
